Ejse Impact	Iii
Guest Editorial	Iv
Reviewers	v
A Review of Behaviour of Prestressed Concrete Sleepers by J. Taherinezhad*, M. Sofi, P. A. Mendis and T. Ngo	1-16
Determination of Dynamic Ballast Characteristics Under Transient Impact Loading by Akira Aikawa	17-34
Investigations on Ballastless Tracks in Tunnel Without Reinforcement by Jia Liu and Stephan Freudenstein	35-40
On the Residual Energy Toughness of Prestressed Concrete Sleepers in Railway Track Structures Subjected to Repeated Impact Loads by Sakdirat Kaewunruen and Alex M. Remennikov	41-61
Recent Australian Developments in Fibre Composite Railway Sleepers by Gerard Van Erp and G. Malcolm Mckay	62-66
Rolling Contact Fatigue (RCF) Defects of Rails In Japanese Railways and Its Mitigation Strategiess by Makoto Ishida	67-74
Structural and Material Characterisation of Insulated Rail Joints by N. Zong, D. Wexler and M. Dhanasekar	75-87
Vertical Dynamic Interaction of Trains and Rail Steel Bridges by Yan Q Sun, Colin Cole, Maksym Spiriyagin, and Manicka Dhanasekar	88-97
